[Cameo](#) says: *One man's journey from mild mannered science teacher to a ruthless drug kin pin all bc this country doesn't have single payer healthcare. Bryan Cranston does an amazing job portraying the antihero of the show, by the end he's so far from his original goals he's become downright evil but at least he admits it. Jess is my favorite, he's such a likable character w/ redeemable qualities & I'd love to see a spin off show focused on him someday.*

Excellent Great Good OK Irritating ICK!
