2 Reviews

Spencer says: *Cinematography was the only thing that saved this movie-Stale parts; Russians as bad guys, Sandra acting panicked and panting, George was good for the short part he had---I fell for the hype & very disappointed*

Cameo says: *I enjoyed the nonstop action & the awesome space scenes, everything looked so cool! I founded myself really rooting for Sandra to get home even as it looked less & less likely that that would happen. This poor lady can never travel in peace.*
